Compatible radio protocols	8
TaHoma box	9

Remote controlled lighting and plugs

■ Remote controlled ON/OFF lighting and plugs / RTS

Indoor micro lighting receiver RTS	10
Outdoor lighting receiver RTS	10
Indoor lighting receiver RTS	10
Lighting slim receiver RTS	10
Remote controlled ON/OFF lamp holder	10
Indoor plug receiver RTS	11
Outdoor plug receiver RTS	11
Outdoor socket receiver RTS	11
Standard receiver RTS	11

■ Remote controlled ON/OFF lighting and plugs / io Plug io

■ Remote controlled dimming lighting receivers and plugs / RTS

Lighting receiver for RTS dimming	12
Indoor dimming socket RTS	12

■ Remote controlled lighting and plugs ON/OFF and dimming / Zwave

Zwave Micro module ON/OFF	13
Zwave Micro lighting dimming module	13
Zwave ON/OFF connected plugs	13
Zwave dimming connected plug	13
Zwave USB key	13

■ CONNECTED LIGHTING 14

Energy Consumption Management

■ Managing heating and air conditioning

Wired programmable thermostat – Dry contact	15
Programmable wireless thermostat – Dry contact	15
Dry contact radio receiver	16
RTS 2 kW slim heating receiver	16
Danfoss living Connect Z	16

■ Electrical consumption monitoring

Electrical consumption sensor + 3 measurement rings Joule effect	16
---	----

Detectors and Home Watch

Visidom IC100 indoor camera	17
Visidom ICM 100 indoor motorized camera	17
Visidom OC 100 outdoor camera	17
Movement detector	17
Movement detector for homes with dogs	17
Movement detector for homes with pets	17
External movement detector	17
Opening detector	17
Smoke detector	17
Corridor movement detector	17
Facade movement detector	17
Hoppe handle	18
Enocean Module	18

Meteo Sensors

Outdoor sun sensor	19
Outdoor temperature sensor	19
Sunis Wirefree RTS	19
Thermosunis Wirefree RTS	19
Eolis RTS	19
Soliris RTS	19

Motor Controls

■ Window Controls

Micro radio receiver for rolling shutter	20
Telis 1 RTS	20
Telis Modulis RTS	20
Telis Modulis Soliris RTS	20
Smooove 1 RTS	21
Smooove 1 open/close RTS	21
Telis Soliris RTS	21

■ Room Controls

Telis 4 RTS	21
Telis 4 Modulis RTS	22
Telis 4 Soliris RTS	22

■ Home Controls

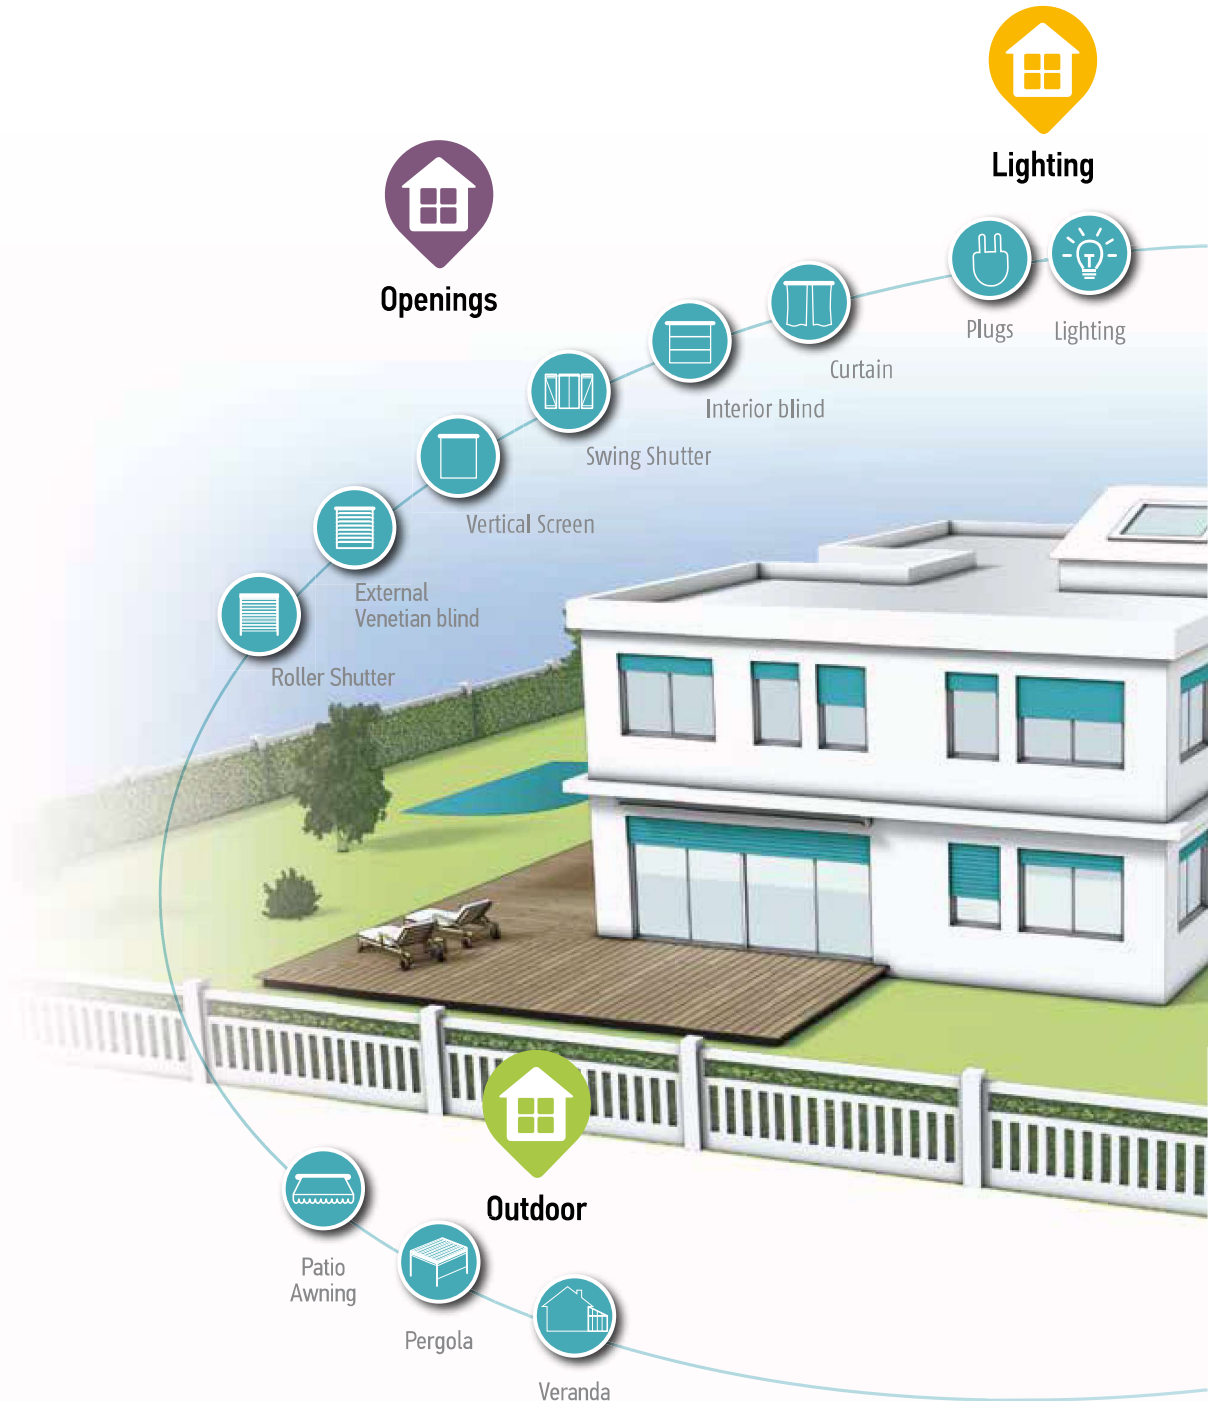

Telis 16 RTS	22
Telis 6 Chronis RTS	22

TaHoma Accessories

TaHoma scenario player	23
Smooove & scenario player finishing frames	23
io Repeater	23

SOMFY

Connected home

Welcome to Home Motion...

Because your expectations in terms of quality of life, security, design or energy savings change...

Because regulations change for a healthy house with respect for the environment...

Somfy has created Home Motion.

The dream becomes reality: motors, controls, automatic systems and alarms interact to get the whole house moving, bringing you comfort and security, working intelligently with your environment.

Power management

Thermostat

Consumption monitoring

Home watch

Home watch & detectors

Detectors' equipment

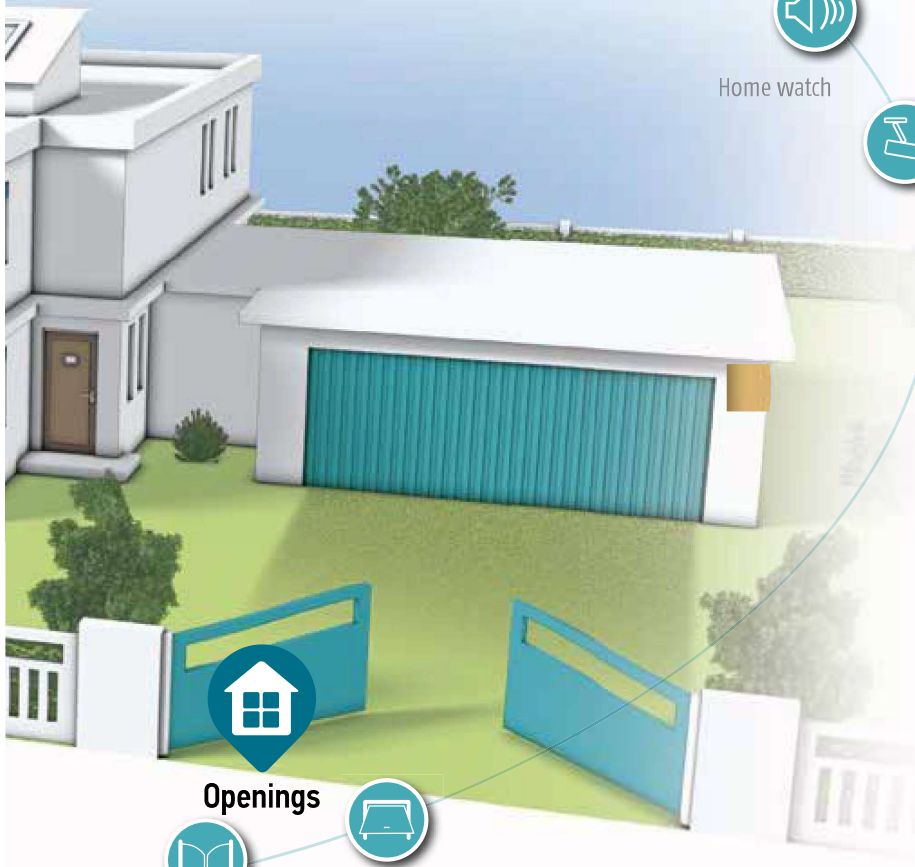

Openings

Gate

Garage door

TaHoma Interface

TaHoma®, the application to control your whole home

Discover the range of house equipment (closing, shutters, blinds, light, gate, heating, alarm, camera, sensor...) on one intuitive and friendly interface. We have made of TaHoma® an upgradable application, to which it is always possible and very easy to add new functions, new equipment and to access a number of numerous services.

TaHoma® Interface

TaHoma® application is available for Android and iOS.

4 menus to manage your house equipment

MY HOME

TO CONTROL EQUIPMENTS

- Manually start-up of equipment of my choice.
- Verify remotely the state of my equipment (open / close / lights on / off...)*

MY SCENARIOS

CREATING CONNECTED MOMENTS IN LIFE

- Centralize numerous connected equipment. For example: scenario "leaving home in the morning" closes all shutters, roof windows and puts off all lights when I leave home.

MY AGENDA

SETTING MY HOME AT MY RHYTHM

- Create a typical "working" day, "relaxing" day or "holiday".
- Program upcoming week days up to one year..

SMART

CREATE SMART SCENARIOS

- Optimize the use of connected equipment by adding energy saving sensors, weather sensors, temperature and/or presence detectors, motion detectors, opening detectors... For example: shutters close automatically in case of absence, if the outside temperature is below 5°C and there is no sun.

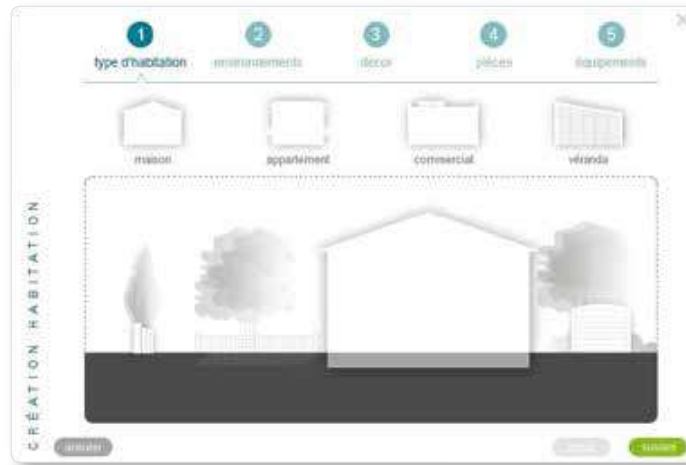

*Only for equipment integrating io-homecontrol or Zwave technologies.

To go further with TaHoma

A new interface that adapts to the user's needs

A TAILOR-MADE INTERFACE

Choose a house, an apartment, a commercial space or a veranda.

YOUR DAILY PROGRAMMING AT A GLANCE

Find your past, current and future programming in your history.

UPDATES ON LIGHT MANAGEMENT

A timer function to put lights on up to 10 minutes, ideal for corridors or external lighting.

MORE FUNCTIONS FOR SENSORS

Find your history of temperatures and sunshine. A function "compare" superimposes curves to compare them, ideal to follow the sun's impact on your home's temperature.

CREATION OF DAYS IS SIMPLIFIED

Find your past, current and future programming in your history.
